# Delphinium

## Fact Sheet

### General

Delphinium belongs to the family of the *Ranunculaceae*. Bartels Stek's delivery program includes both the double flowered *Delphinium elatum* hybrids as the single flowered *Delphinium belladonna* hybrids. Available Delphinium varieties in the Bartels delivery program are summarised below.

Variety	VBN No.	Colour
<b>Delphinium</b>		
Princess Caroline®	2495	salmon pink
Red Caroline®	17128	red
Delft Blue		Blauw/wit

### Basics

For growing Delphinium, temperate climates with cool nights (6-12°C) is advised. Daytime temperatures should not exceed an average temperature of 25 °C. Production positively influenced by high light intensities. The above mention varieties has to grow in covered greenhous.
